

The Jaunty 20 has been in service as a day hire boat on the Norfolk Broads since the late 1940's. Originally constructed from wood, we decided to put into production a craft that had all the appeal of the original Jaunty, but utilised modern GRP build techniques. The standard Jaunty 20 comes with electric motor, twin battery banks, AC charger unit, warps, fender, anchor & canopy. The varnished interior can be complimented with teak floors and/or decks if required. Upholstery can be in PVC or upgraded to leather, or a material/pattern of your choice and the canopy is fitted as standard. The engine can be either electric or diesel. Other upgrades are available upon request.
